First time set-up
volatiles lighting panel (2nd generation)
Quick guide

Welcome!

First time set-up

Quick guide

1 Make sure your volatiles surface is powered on and within reach of a stable WiFi signal.

2 Download the volatiles app from the AppStore (iOS only) and register your account. You will receive an email to set your password.

3 Go to your Wi-Fi settings of your device and connect to the volatiles network (starts with "volaTiles-xxx"). Insert the Wi-Fi password provided on the QR-code card. You may see a message "No internet connection!", which you can safely ignore.

4 Open the app and go to the section "Surfaces" under settings, refresh the list and after a few moments you will see the new surface.

First time set-up

Quick guide

5

Click on the + symbol and scan the QR-code provided on the QR code card.

Example

6

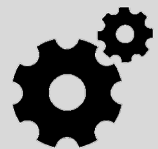

The app will show a list of available Wi-Fi networks. Choose the one which you want to associate the surface with. Enter the password of that network and wait until the surface is successfully paired with it.

Default network

7

If not done automatically, go back to your device Wi-Fi settings and select your default Wi-Fi network.

8

Well done! You're good to go. Enjoy volatiles!
